### FREQUENTLY ASKED QUESTIONS

# What is GST?

The Goods and Services Tax, or GST, is a new tax that will be levied on the sale and purchase of goods and services. Unlike existing taxes in India, the GST will be applied to the value added at each stage of the supply chain of a product, rather than on the total value of the product at each stage. Buyers will get input tax credits for the tax paid on the purchase of goods and services, which they can offset with the tax to be paid on the supply of goods and services. As a result, the customer who purchases the product at the end of the supply chain process will pay only the tax applied by the last seller in the supply chain.
